

Bench Mat

Improves accuracy, precision and assembly time.

Approved for use in all classes of clean rooms, including microelectronics, micro mechanics, semiconductor, pharmaceutical, biotech and medical device

No outgassing - Silicon Free and DOP free

Non-Particulating - helmke drum test.

Non-slip properties – Prevent the movement and loss of small items and components.

Cushions and stabilises fragile laboratory equipment.

Portable anti-static mat – Ideal to carry around in a service engineers tool kit.

Protect sensitive products by safely draining static discharge (10^8 ohms resistance)

Product Information

Available in 0.6m width – Lengths 0.45m or 12m.
Thickness 2.5mm +/-0.1mm.

Rolls available on request – ideal for covering workstations. Available in black or grey

ESD: 10^8 ohms resistance, Supplied with earthing studs

Heat resistance: working range $0^{\circ}\text{c} - 50^{\circ}\text{c}$

Resistant to most chemicals

2 year warranty
