

To reduce the risk of infections, use Dycem.

Independent tests carried out at GlaxoSmithKline prove that Dycem High Performance Contamination Control Zones prevent over 99% of all viable and non-viable foot and wheel borne contamination from entering a critical area.

Dycem is of immense benefit to Nuclear Medicine, Hospitals and Pharmacy units as it prevents contamination from being carried into the critical area. Dycem is used in Nuclear Medicine and Pharmacy Aseptic units to help prevent contaminants from getting into medicines and drugs. Dycem is also used outside Operating Theatres, Post Recovery Areas, ITU's, CSSD, Isolation Wards and many other critical areas to help protect the health of the patient and staff.

**Use Dycem at:**

- All entrances to prevent the ingress of microbial contamination.
- All exit ways to reduce the risk of cross infection.
- Inside the critical areas to reduce the amount of airborne microbes.

Dycem products contain an integral anti-microbial additive. Our products have been successfully tested against 50 common organisms including Salmonella, E.coli, Listeria, Campylobacter, Pseudomonas, A.Niger (black spot mould growth), and Algae. The Biomaster additive also helps combat MRSA.

For further details of these tests and purity information on outgassing visit [www.dycem-cc.com/tpapers](http://www.dycem-cc.com/tpapers)

Resistant Staphylococcus bacteria. Mag x 24,000 (SEM)

Cleaning overshoe soles as leaving recovery area.

We have been using and testing Dycem in our Pharmacy, Sterile and Aseptic areas. The tests carried out have established the effectiveness of Dycem in controlling microbial contamination and potential cross contamination from feet and wheels.

**Christina Lowe**  
Singleton Hospital, Swansea

We have used Dycem for many years in our Aseptic Processing areas. We use it in transfer hatches (for wheels) and at entrances/exits to restrict the outside micro-organisms from getting into the facility.

**David Cope**  
Kings College Hospital

Dycem is used outside of Theatres and all the users, especially orthopaedic staff, are very happy with it seeing the levels of dust and dirt it removes prior to their critical environments.

**Gerry Vellers**  
Royal Marsden Hospital, Chelsea

Please contact us for specialist advice on the right option for your facility:

**UK** +44 (0) 117 955 9921 or email: [uk@dycem.com](mailto:uk@dycem.com)

**USA** 1-800 458 0060 or email: [info@dycemusa.com](mailto:info@dycemusa.com)

**ProtectaMat** - is a loose laid mat designed to control foot and wheel borne contamination. The ProtectaMat is also available with a self-adhesive backing option for heavier wheeled traffic.

**CleanZone** - is a High Performance Contamination Control Zone designed to attract, collect and retain viable and non-viable contamination. Suitable for light wheeled traffic and heavier pedestrian flows. Available in a range of mat or floor covering options to suit your facilities needs.

**WorkZone** - is a heavy duty version of CleanZone designed for use where there are concerns about contamination and cross contamination from personnel, and the wheels of carts including pallet trucks, fork lifts, trolleys & vessels.

**Cleaning** - Dycem recommend their high performance range of cleaning products and equipment, designed to maximise product performance and life cycle.

**Bench Mat** - prevents movement of components and loss of small items. Improves accuracy, precision and assembly time and great for stabilising fragile laboratory equipment.

**Non-slip products** - Dycem Non-Slip products are non-sticky but amazingly grip to any surface without the use of an adhesive. They effectively cushion, stabilise and protect products and equipment. Dycem Non-Slip is available in a range of product options including reels, mats, self-adhesive panels and discs.
