

Independent tests prove that Dycem is over 99% effective at attracting, collecting and retaining foot and wheelborne microbial contamination.

Many of the global manufacturing companies in the Optical industry use Dycem High Performance Contamination Control Zones as part of their ongoing continuous improvement programmes and general good house-keeping regimes. Dycem effectively stops dust, dirt, hairs, fibres and other particulates from getting into the manufacturing process and therefore helps to reduce production loss.

Independent tests prove that Dycem is over 99% effective at attracting, collecting and retaining foot & wheel borne contamination.

Dycem plays a key role in the manufacture of:

- Optical solutions and liquids
- Spectacles
- Contact lenses
- Windscreens
- Microscopes
- Camera lenses
- Optical lenses and mirrors

Coopervision use Dycem CleanZone as part of an integrated strategy and have found it to significantly improve their product yields.

Some of our delighted users include:

Transitions Optical, Coopervision, Hoya Lens, Acuvue, Johnson & Johnson, Rodenstock, Pilkington and Bausch & Lomb.

Where to Use:

- All entrances and exit ways to prevent the ingress of contamination.
- Inside the critical areas to reduce the amount of airborne microbes.

"We are the contract cleaners to the largest optical manufacturer of contact lenses and solutions in the UK. It is paramount that all of the manufacturing facility is kept as clean as possible at all times. We have found Dycem very easy to clean and the most effective means of trapping contamination in places other than critical areas."

Mike Ross, Ross's Cleaning Services.

Dycem CleanZone installed prior to entryway of optical lens manufacturer Hoya Lenses.

Dycem installed at entrance way of premier lens manufacturer Carl Zeiss.

Dycem High Performance Zone controls foot and wheel borne contamination at a global optical manufacturing facility.

Please contact us for specialist advice on the right option for your facility:

ProtectaMat - is a loose laid mat designed to control foot and wheel borne contamination. The ProtectaMat is also available with a self-adhesive backing option for heavier wheeled traffic.

CleanZone - is a High Performance Contamination Control Zone designed to attract, collect and retain viable and non-viable contamination. Suitable for light wheeled traffic and heavier pedestrian flows. Available in a range of mat or floor covering options to suit your facilities needs.

WorkZone - is a heavy duty version of CleanZone designed for use where there are concerns about contamination and cross contamination from personnel, and the wheels of carts including pallet trucks, fork lifts, trolleys & vessels.

Cleaning - Dycem recommend their high performance range of cleaning products and equipment, designed to maximise product performance and life cycle.

Bench Mat - prevents movement of components and loss of small items. Improves accuracy, precision and assembly time and great for stabilising fragile laboratory equipment.

Non-slip products - Dycem Non-Slip products are non-sticky but amazingly grip to any surface without the use of an adhesive. They effectively cushion, stabilise and protect products and equipment. Dycem Non-Slip is available in a range of product options including reels, mats, self-adhesive panels and discs.
