

To reduce the risk of contamination, use Dycem

Independent tests prove that Dycem is 99.8% effective at attracting, collecting and retaining foot and wheel borne contamination right down to 0.1µm.

Hair and Skin Contamination
Mag x 24,000

Contamination has a dramatic effect on product yields, reworking and operational effectiveness. The effect on profitability can run into millions.

Dycem can help improve your profits. Dycem prevents over 99% of foot & wheel borne contamination from entering the production area which means less re-working, rejection rates and dissatisfied customers.

Dycem provides a significant business benefit to all key areas of electronics manufacture including:

- Semiconductor
- Fibre Optic
- Hard Disc Drive
- Photo Mask
- TV
- Mobile
- CRT & TFT screens

Some of our delighted customers include Philips, Infineon, Seagate, Altis Clean Concept, Photronics and Sony.

Dycem CleanZone covers the whole changing area at Photronics, UK.

Dycem WorkZone installed in the changing area at Altis.

Use Dycem at:

- All entrances to prevent the ingress of contamination.
- All exit ways to reduce the risk of cross contamination.
- Inside the critical areas to reduce the amount of airborne particulates.

"We have used Dycem for over 6 years, it is the most effective and cost effective method of preventing contamination down to less than 5 micron and stops it from getting into our photo mask manufacturing facility."

Susan Jeynes, Project Engineer
Photronics, Wales.

"We invested in Dycem some five years ago to protect our critical environments i.e cleanrooms and camera assembly. Owing to the success of our manufacturing we have now built new cleanrooms and improved the cleanliness of our controlled areas. The improvement in those areas is very much down to the Dycem product."

Mark Wells
Sony, Wales.

Dycem CleanZone, WorkZone, ProtectaMat, and Bench Mats are Static Dissipative with 108 ohms resistance. All products have no silicon, latex or DOP outgassing.

Dycem Cleanzone covers the whole changing area at electronics giant Phillips to reduce the levels of contaminants entering the cleanroom.

Dycem CleanZone installed outside the entryway of a critical area at Sony.

Please contact us for specialist advice on the right option for your facility:

ProtectaMat - is a loose laid mat designed to control foot and wheel borne contamination. The ProtectaMat is also available with a self-adhesive backing option for heavier wheeled traffic.

CleanZone - is a High Performance Contamination Control Zone designed to attract, collect and retain viable and non-viable contamination. Suitable for light wheeled traffic and heavier pedestrian flows. Available in a range of mat or floor covering options to suit your facilities needs.

WorkZone - is a heavy duty version of CleanZone designed for use where there are concerns about contamination and cross contamination from personnel, and the wheels of carts including pallet trucks, fork lifts, trolleys & vessels.

Cleaning - Dycem recommend their high performance range of cleaning products and equipment, designed to maximise product performance and life cycle.

Bench Mat - prevents movement of components and loss of small items. Improves accuracy, precision and assembly time and great for stabilising fragile laboratory equipment.

Non-slip products - Dycem Non-Slip products are non-sticky but amazingly grip to any surface without the use of an adhesive. They effectively cushion, stabilise and protect products and equipment. Dycem Non-Slip is available in a range of product options including reels, mats, self-adhesive panels and discs.
